

# WHEN WATERS SPEAK

## GENERATION ANTHROPOCENE: HACKATHONS, ART PRACTICES AND LIQUID NARRATIVES IN A SCIENCE MUSEUM

26 February 2024  
2:00 – 3:30 pm CET

MUSE - Museo delle Scienze, Trento (IT)

This webinar will focus on the pioneering creative hackathon “Generation Anthropocene: Generating the Anthropocene”, which took place at the Science Museum of Trento (MUSE) in June 2023. The creative hackathon was part of MUSE’s NxT Programme, sitting at the intersection of science, arts and environmental humanities and convened through the projects *We Are the Flood*, curated by Stefano Cagol, and *Like Life*, curated by Mali Weil. Together with Carlo Maiolini from MUSE, artist and curator Stefano Cagol and the artist collective Mali Weil, we will discuss the role of science museums in tackling contemporary complexities and the potential of art and design to help us imagining new futures.

### Programme

02:00 – 02:05: Webinar Welcome by Emanuele Fantini, IHE Delft

02:05 – 02:50: Panel Presentations

- Carlo Maiolini, Public Programme Office, MUSE, Trento – [Hackathon: Generation Anthropocene](#)
- Stefano Cagol, artist and curator – [We Are the Flood](#)
- Mali Weil, artist collective – [Like Life](#)

02:50 – 03:10: Roundtable Discussion with artists Mary Mattingly and Regina Hugli

03:10 – 03:25: Audience Q&A

03:25 – 03:30: Closing Remarks by Eriberto Eulisse, WAMU-NET

---

‘When Waters Speak’ brings together researchers, artists, museum curators, and all people curious to discover how we can represent and give voice to water at the intersection of education, science, arts, and communication. This webinar is organised by the Global Network of Water Museums and IHE Delft, with the support of the Dutch Ministry of Infrastructure and Water Management, as part of the new series of webinars titled ‘When Waters Speak’.
