Letters from the Future: Children and Teens Speak on Climate Change

It's start here!

Letters from the Future: Children and Teens Speak on Climate Change

Objectives

Youth Participation

The project aims to involve young people in the climate discussion, allowing their voices to be heard and contributing to the debate on the water and environmental crisis.

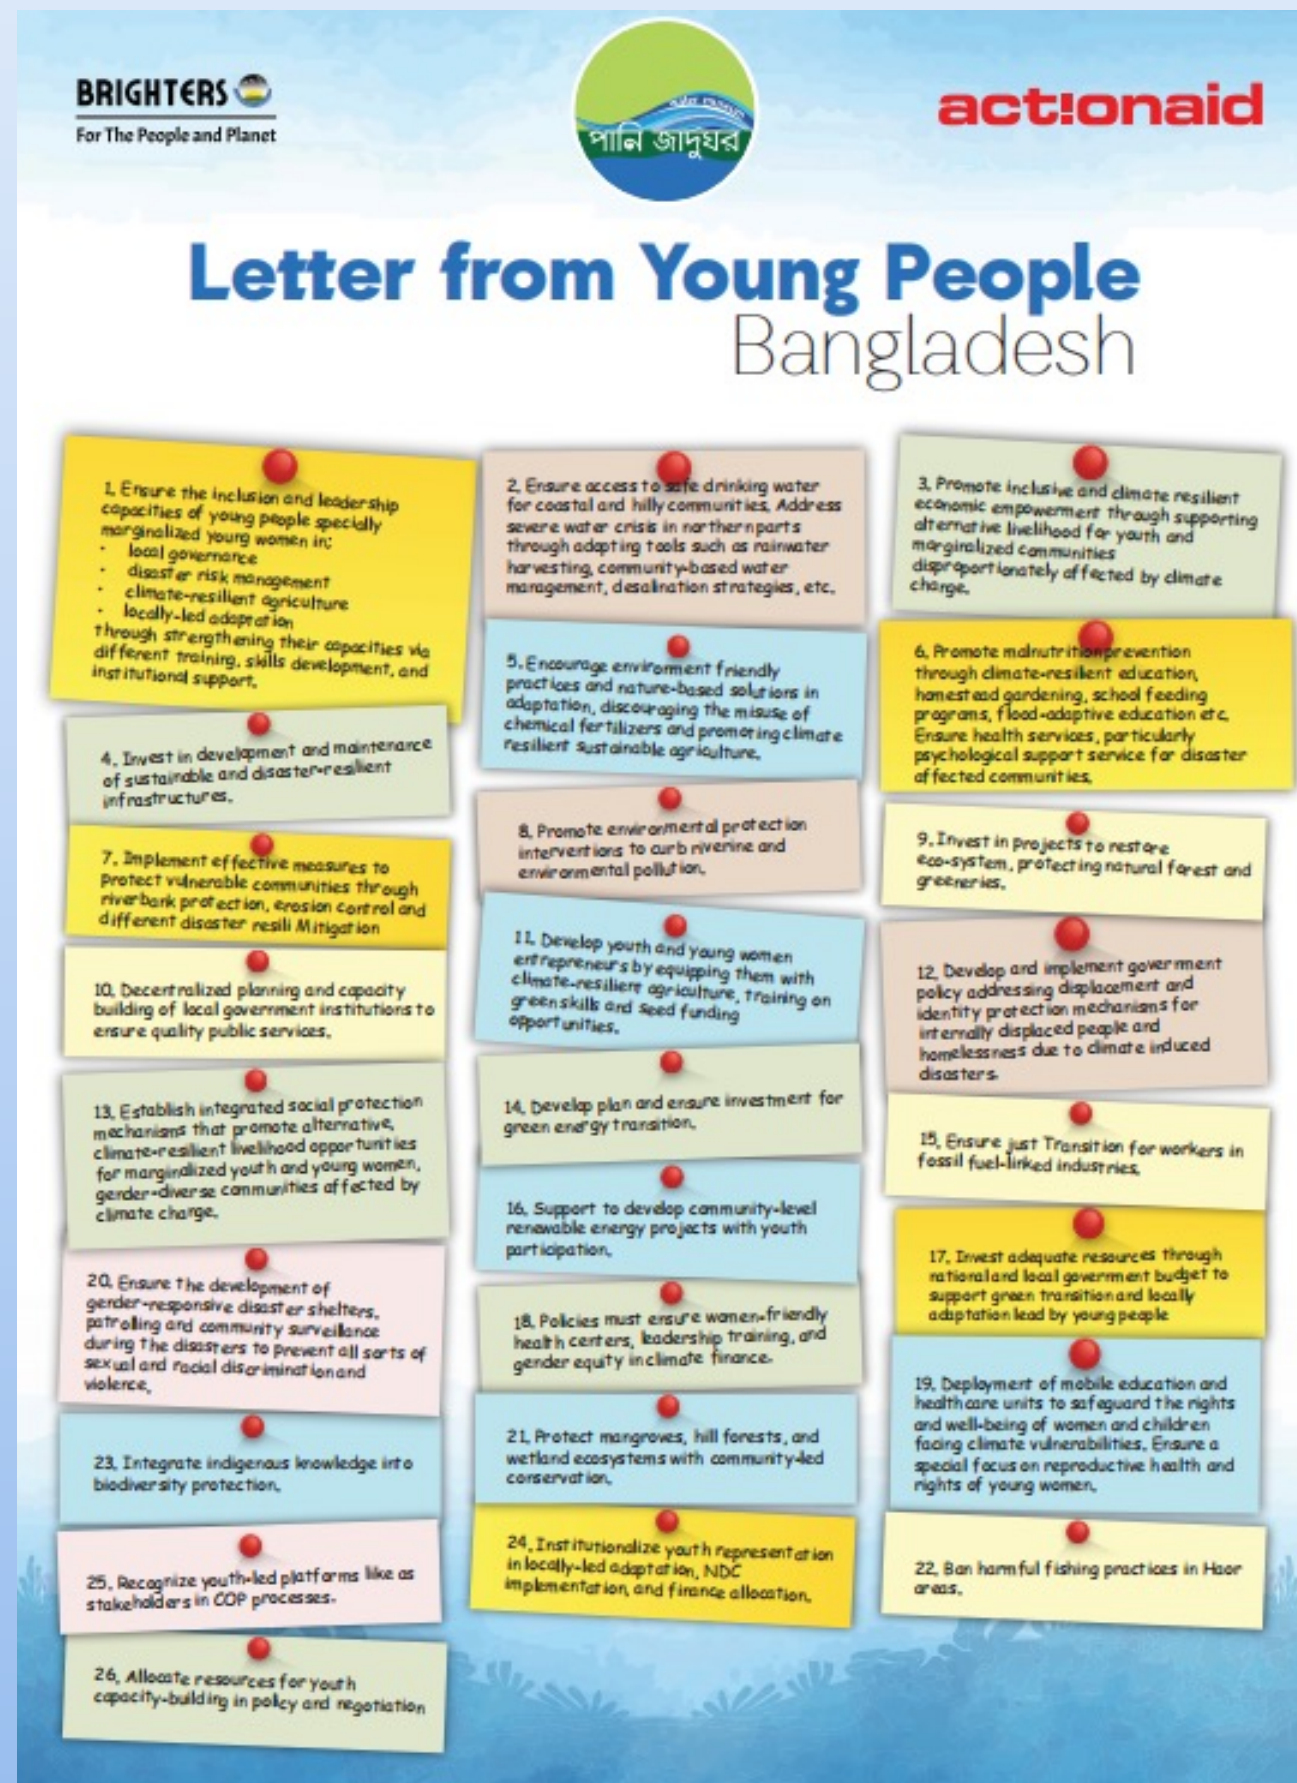

Connecting Cultures

The initiative promoted the union of cultures, connecting students from different countries and encouraging dialogue between them on environmental issues and their hopes for the future.

Raising Awareness

Among Negotiators By collecting letters from young people, the project seeks to raise awareness among COP negotiators, highlighting the perspective of new generations on climate and environmental health issues.

Letters from the Future: Children and Teens Speak on Climate Change

970

Total Letters Collected

The total number of letters collected from youth across Brazil and internationally is approximately 970, showcasing a powerful mobilization of voices for climate action..

Letters from the Future: Children and Teens Speak on Climate Change

Main Concerns of Brazilian Youth

Rivers Preservation

Young people expressed strong concern about the preservation of rivers, emphasizing the importance of these water sources for life, biodiversity, and their cultural and social value.

Pollution

Especially caused by waste and microplastics, was a recurring theme among participants, reflecting their worries about environmental health and its direct consequences for communities.

Impacts of droughts

The impacts of droughts and wildfires led to alarming accounts of water scarcity, affecting not only natural ecosystems but also agriculture and food security within communities.

Main Concerns of International Youth

Youth Engagement

Countries such as Indonesia and India demonstrate strong youth engagement, showing the potential of young voices to influence climate discussions and contribute to global solutions.

Diverse Themes

Participants address various themes, including floods, pollution, and community health, illustrating the urgent issues faced by youth world wide in the context of climate change and environmental health.

Global Solidarity

The collaboration across nations emphasizes global solidarity, highlighting how youth from diverse backgrounds unite to advocate for environmental protection and climate responsibility on a worldwide stage.

Letters from the Future: Children and Teens Speak on Climate Change

Highlights

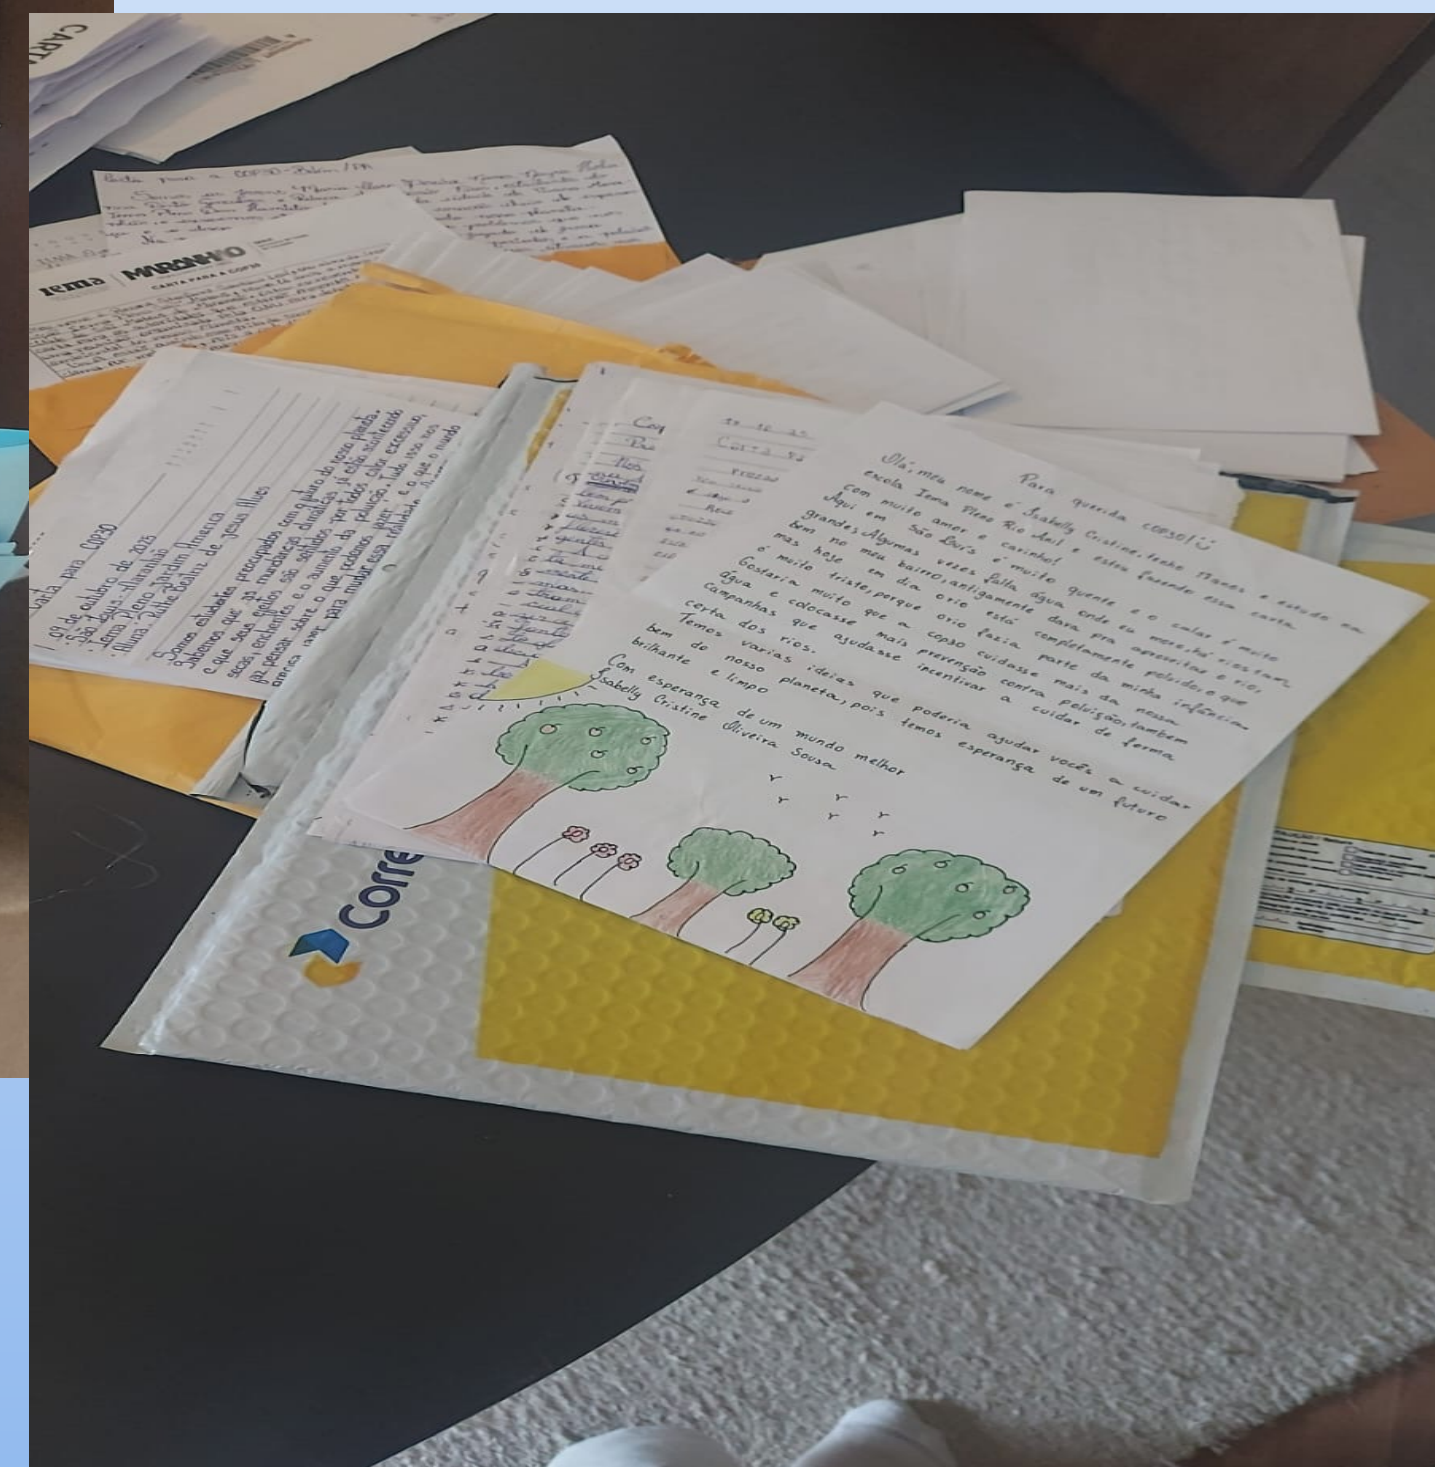

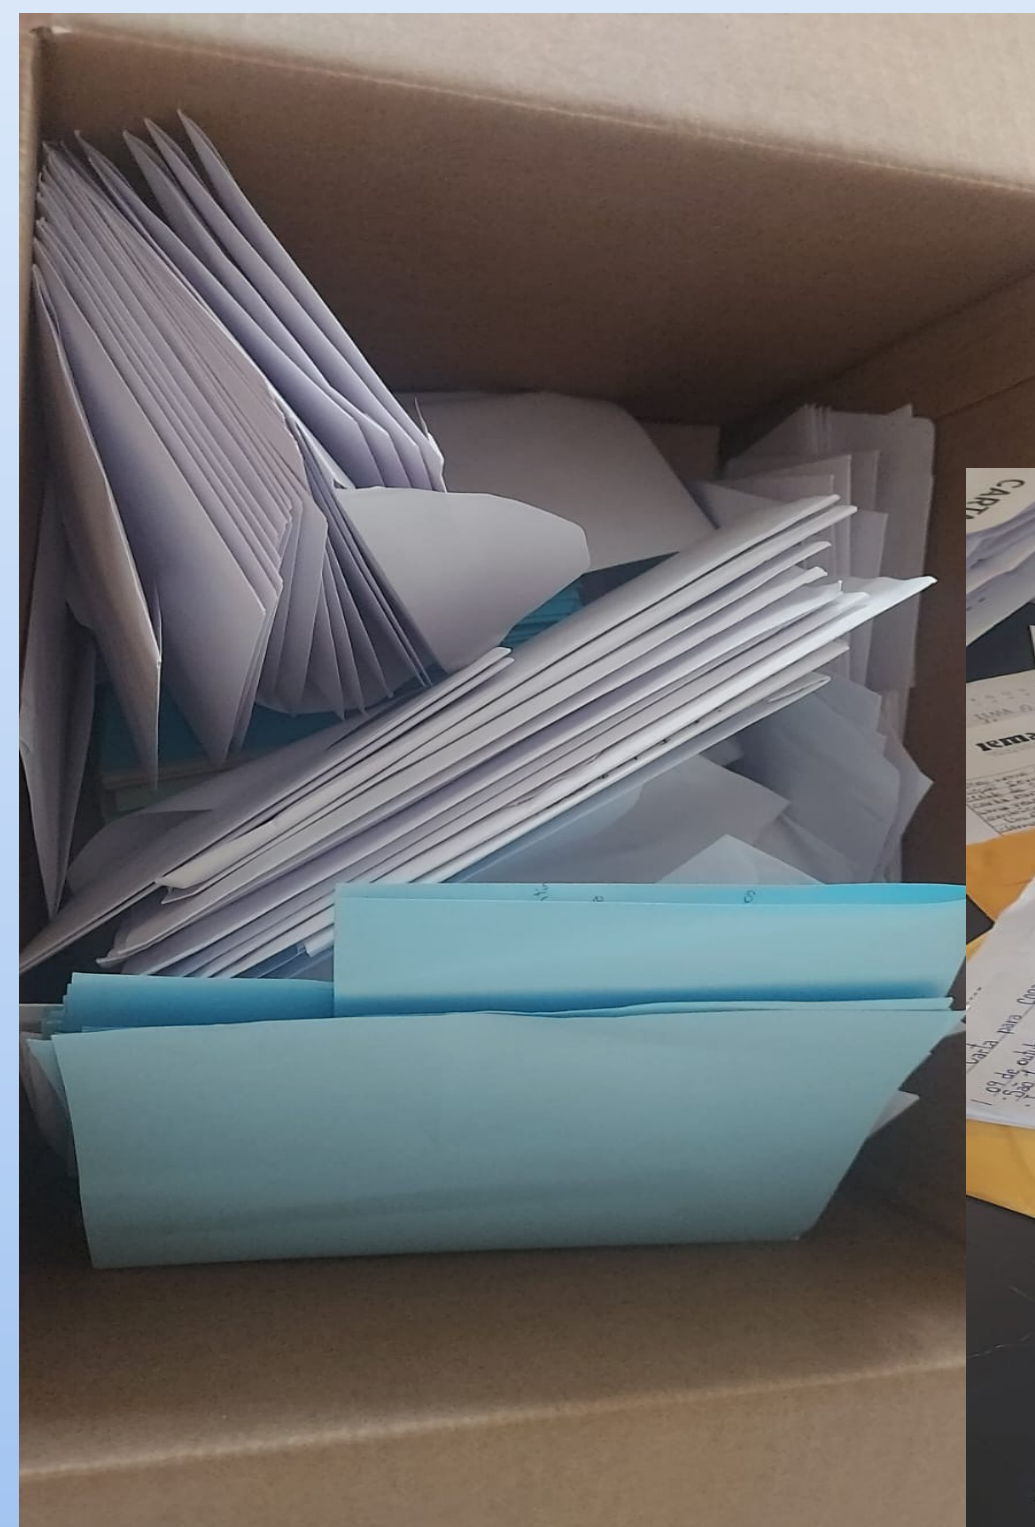

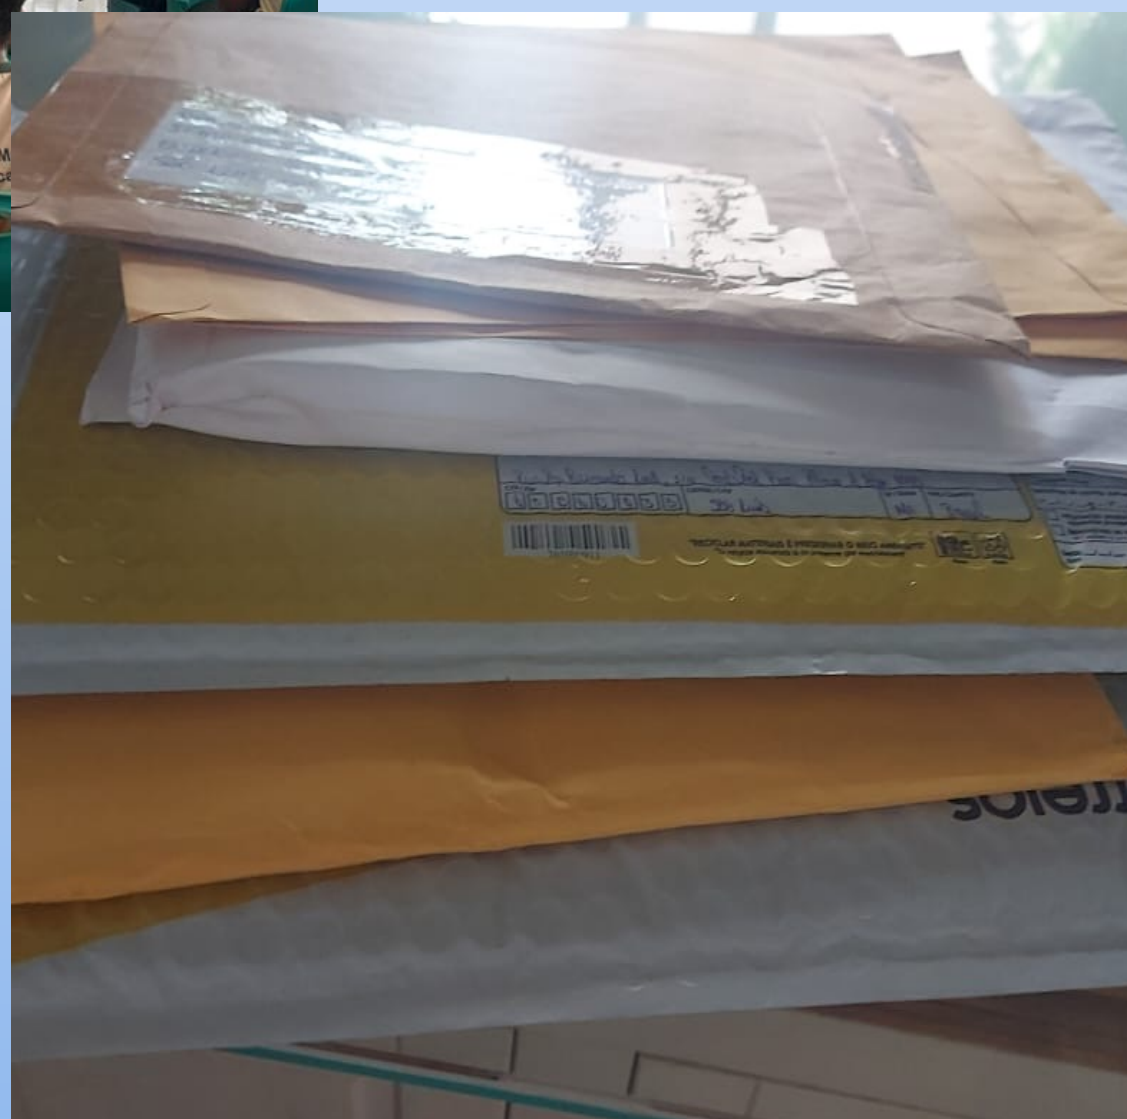

1. Floods and pollution are major concerns for Indonesia.

2. Erosion and drought significantly impact agriculture in India.

3. Climate responsibility is emphasized by youth from both countries.

Next Step: Delivering the Letters!

- ❖ To the COP 30 Presidency
- ❖ To Heads of Delegation
- ❖ To Thematic Negotiators (e.g., water, adaptation, loss and damage, youth)

“Waters for Well-Being” is both a invitation: to transform museums, languages, and communities into living ecosystems of care, from the river to the classroom, from the village to the city, from COP30 in Belém to the G20 in South Africa.

Partnership with the Colmeia/CLICA Arte4×4, Observatory of Resilience and Mental Health, in collaboration with the Billion Minds Institute,

Children20

**Change begins
when we are heard**

**A just world where every
child's rights, voice, and
potential shape the decisions
that define our future.**
